Akali's kunai template

made by: Painbow

printing instructions:

- print at 100% to make the
template as big as possible to fit one A4
sheet of paper
the kunai will be 27,5 cm
/about 10,8 inches

- to print a bigger kunai:
while in the print menu go to
page sizing & Handling
> select Poster
> Set the Tile scale higher to make
the template as big as you want.

It will now be printed onto multiple
sheets of paper. Afterward you'll just
have to tape the pieces togheter and
voilà! you got yourself a bigger template!

I hope this template will be helpfull with making
your own Akali kunai! If you ever post a picture with
your kunai I would love to see it!
